(54) Title: A MOP ASSEMBLY AND A MOP COMPRISING SUCH A MOP ASSEMBLY

(57) Abstract: The present invention relates to a mop and a mop assembly for cleaning of among other things floors. The mop assembly comprises an under side (13) having a cleaning cloth, an upper side (14), parallel with the under side, provided with a holder (15, 16, 17) for holding a shaft, and a least one side surface that interconnects the under side with the upper side. A liquid scraper (18) and a stain scraper (20) are fastened to said side surface opposite to each other on opposite sides of the under and upper sides, such that the mop assembly can handle three different cleaning functions.
